

Kurve Wireless for iPod

Kurve Wireless for iPod[®] allows you to wirelessly playback and share your music over your home hi-fi system or your powered PC speakers. The Kurve Wireless for iPod product consists of two stereo Bluetooth[®] devices: the Kurve Receiver, which connects to a stereo system, and the Kurve Adapter, which connects to an iPod. You can also use the Kurve Receiver to receive and playback music from other *Bluetooth Stereo Devices*, such as *Bluetooth* enabled MP3 Players, Laptops and Mobile Phones.

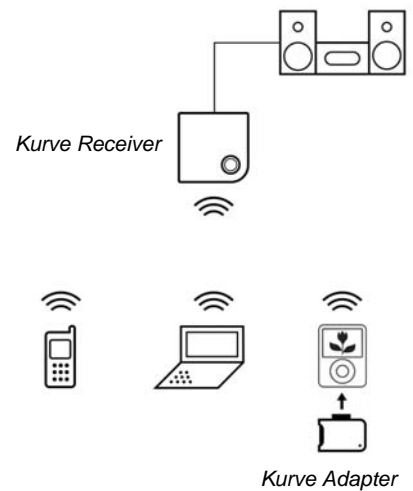

□ Kurve Receiver Features

- Simple one-touch interface for pairing and control
- Intelligent signal optimization (ISO)
- High quality Wolfson[®] audio codec
- Supports other *Bluetooth Stereo* devices (Mobile phones, MP3 players, laptops)

□ Kurve Adapter Features

- Simple Plug and Play operation
- Auto connects to Kurve Receiver
- Powered by iPod – proprietary power design that minimizes power drain
- Supports *Bluetooth Remote* control profile
- Supports “pass through” charging of your iPod device, through USB
