

## Kurve Wireless Stereo Receiver

Kurve is a wireless stereo streaming receiver that can be connected to any hi-fi system to play music wirelessly from suitable Bluetooth-enabled stereo transmitters, such as mobile phones, PDAs, iPod and other similar devices.

### Key features

- Simple one-touch interface for ease of use
- Easily connects to headphones and stereo amplifier systems
- Wireless operating range of up to 10m
- Conforms to Bluetooth specification, for trouble-free interfacing with millions of Bluetooth enabled streaming devices
- Supports Bluetooth A2DP stereo and AVRCP remote control profiles
- High quality sound output based on sophisticated Wolfson® codec. Compliments any high-end sound system.
- Modern design with high-gloss black finish
- Forms stacking hi-fi system with Kurve Amplifier and Stereo Speaker set
